PROJECT EXPERIENCE

“Relax Map”, 2026

GitHub Frontend: <https://github.com/AlisaPagan/chillscape-frontend> | **GitHub Backend:** <https://github.com/AlisaPagan/chillscape-backend> | **Live page:** <https://chillscape-frontend.vercel.app/>

Full-stack platform for discovering, reviewing, creating, and editing relaxation locations with user profiles.

Role: Scrum Master, Full-Stack Developer.

- Organized team calls, workflow, and sprint communication as Scrum Master.
- Collaborated closely with the Team Lead on code review, debugging, and final project cleanup.
- Developed backend user endpoints for current user data and user profile updates.
- Created frontend API utilities and proxy setup to connect the Next.js frontend with the backend API.
- Built the frontend user profile page and integrated it with backend API data.
- Reworked key frontend sections including the locations page, homepage reviews, popular locations, and location cards.
- Implemented and fixed dynamic logic for fetching and displaying locations, reviews, and user-related content.
- Improved responsive styling, layout consistency, and UI polish across key project sections.
- Worked on creating and editing locations, including form behavior and API integration.

Tech stack: TypeScript, React, Next.js, Node.js, Express, MongoDB, CSS Modules, REST API, Axios, TanStack Query

“NoteHub”, 2026

GitHub: <https://github.com/AlisaPagan/09-auth> | **Live page:** <https://09-auth-two-bice.vercel.app/>

Web application for managing personal notes with authentication, user profiles, protected routes, and SEO-focused structure.

Role: Frontend Developer.

- Built the application using Next.js, React, and TypeScript.
- Implemented notes listing, creation, and category-based filtering using a backend API.
- Developed modal windows for viewing note details.
- Implemented pagination using React Paginate.
- Integrated authentication flow (login, signup, logout) with public and private routing.
- Applied SEO-focused page structure and metadata.

Tech stack: TypeScript, React, Next.js, Axios, React Paginate, Zustand, TanStack Query

“Yoga Bloom”, 2025

GitHub: <https://github.com/AlisaPagan/FlowBloom> | **Live page:** <https://alisapagan.github.io/FlowBloom/>

One-page website for a yoga studio with training plan selection and inquiry submission.

Role: Team Lead, Frontend Developer.

- Developed responsive modal windows and form components using HTML and CSS.
- Implemented layout and UI elements with a focus on responsiveness and usability.
- Set up and maintained the project GitHub repository and workflow.
- Reviewed and fixed team code, providing feedback and requesting revisions.
- Supported team members with Git workflows and frontend debugging.

Tech stack: HTML, CSS, JavaScript

WORK EXPERIENCE

Graphic Designer / Level Designer, Enjoy Games, 2021-present

- Created marketing materials (ad banners, videos, store assets) for paid ad platforms.
- Assisted with level assembly and playable ads for mobile games.
- Collaborated with developers using JavaScript-based ad formats.

Web & Graphic Designer, DigitalianLab, 2019-2025

- Built client websites using WordPress and Elementor.
- Designed logos and print materials for small businesses.
- Assisted with content and digital marketing materials.
